# PROGRAM

# STATE FINAL CERTIFICATION

Education program Specialty 31.05.01 «General medicine»

Form of study: full time

Vladivostok 2019

#### **EXPLANATORY NOTE**

Mastering the main educational programs of higher education is completed with a mandatory state final certification of graduates.

The program of the final state certification of the educational program 31.05.01 General medicine (specialty level) was developed in accordance with the requirements of the "Procedure for conducting state final certification for educational programs of higher education - undergraduate programs, specialty programs and graduate programs", approved by order of the Russian Ministry of Education from 29.06. 2015 No. 636; "Regulations on the state (final) certification of graduates of the Federal State Autonomous Educational Institution of Higher Professional Education "Far Eastern Federal University", approved by the order of the Acting Rector of November 27, 2015 No. 12-13-2285.

In accordance with the Federal State Educational Standard of Higher Education of the educational program 31.05.01 General medicine (specialty level) approved by order of the Ministry of Education and Science of the Russian Federation of February 9, 2016 No. 95, the structure of the state final certification includes preparation for a taking and taking of the state exam.

For students with disabilities, the state final certification is carried out by the organization, taking into account the peculiarities of their psychophysical development, their individual capabilities and health status. Features of the state certification tests for persons with disabilities are set out in the Regulations on the state final certification of graduates of the Federal State Autonomous Educational Institution of Higher Professional Education "Far Eastern Federal University" (approved by order No. 12-13-2285 of 11.27.2015, last change).

During the state final certification, the following general requirements are met:

conducting state final certification for persons with disabilities in the same classroom together with students who do not have limited health opportunities, if this does not create difficulties for students in passing the state final certification; the presence in the audience of an assistant (assistants) who provide the necessary technical assistance to students with disabilities, taking into account their individual characteristics (take a job, move, read and execute a task, communicate with members of the state examination commission);

the use of the necessary technical means for students with disabilities when passing the state final certification, taking into account their individual characteristics;

ensuring the unhindered access of students with disabilities in the classroom, toilets and other rooms, as well as their stay in the specified rooms (presence of ramps, handrails, extended doorways, elevators, in the absence of elevators, the audience should be located on the first floor, special chairs and other devices).

# Characteristics of professional activity of the graduates - the qualification characteristics of the graduate

The field of professional activity of the graduates who have mastered the program of the specialty including protection of the health of citizens by ensuring provision of medical care in accordance with the established requirements and standards in the field of health care.

The objects of professional activity of graduates who have mastered the program of specialty are:

individuals (patients);

population;

a set of tools and technologies aimed at creating conditions for the protection of public health.

**Types of professional activity** for which graduates who have mastered the specialty program are preparing:

- medical;

- organizational and managerial;

- research.

Making a development and implementation of the program of specialty, the School of Biomedicine FEFU focuses on a specific type(s) of professional activity for which a specialist is prepared, based on the needs of the labor market, research and material and technical resources of the organization.

A graduate who has mastered the specialty program is ready to solve the following professional tasks in accordance with the type(s) of professional activity to which the specialty program is focused:

## medical activities:

- prevention of the disease occurrence among the population through preventive and anti-epidemic measures;
- conduction of preventive medical examinations, clinical examination, and follow-ups;
- collection and medical-statistical analysis of information on the health indicators of population of different age and sex groups, characterizing their health status;
- diagnostics of diseases and pathological conditions of patients;
- diagnostics of emergency conditions;
- diagnostics of pregnancy;
- evaluation of temporary disability and participation in other types of medical expertise;
- provision of primary medical and sanitary care in outpatient and day care units;
- rendering primary medical and qualified medical care in case of sudden acute diseases, conditions, exacerbation of chronic diseases that are not accompanied by a threat to patient's life and do not require emergency medical care;
- participation in the provision of emergency medical care in conditions requiring urgent medical intervention;

- emergency medical assistance, including participation in medical evacuation;
- participation in the conduct of medical rehabilitation and SPA-resort treatment;
- formation of motivation among the population, patients and their family members aimed at preserving and strengthening their health and health of those around them;
- patient education regarding basic hygiene measures of a healthimproving nature contributing to prevention of the disease onsets and health promotion;

## organizational and management activities:

- application of the basic principles of the medical care organization in medical facilities and their structural units;
- creation the favorable conditions in medical organizations for the stay of patients and work of medical personnel;
- keeping medical records in medical organizations;
- organization of medical examination;
- participation in the organization of the quality care assessment for patients;
- compliance with basic information security requirements;

## research activities:

- analysis of scientific literature and official statistical reviews, participation in the conduct of statistical analysis and public presentation of the results;
- participation in the solution of individual research, scientific and applied tasks in the field of health care for diagnostics, treatment, medical rehabilitation and prevention.

# 1. Requirements for the outcomes of the educational program mastering in the field of study

# **31.05.01** General medicine (specialty level)

As a result of mastering the specialty program, the graduate must have general cultural, general professional and professional competences.

1. A graduate who has mastered a specialist program should have the following general cultural competencies:

- ability of abstract thinking, analysis, and synthesis (GCC-1);
- ability to use basics of philosophical knowledge to form the ideological position (GCC-2);
- ability to analyze the main stages and patterns of the historical development of society for the formation of citizenship (GCC-3);
- ability to act in non-standard situations, to possess social and ethical responsibility for the decisions made (GCC-4);
- readiness for self-development, self-realization, self-education, the use of creative potential (GCC-5);
- ability to use methods and tools of physical culture to ensure full social and professional activities (GCC-6);
- readiness to use first aid techniques, methods of protection in emergency situations (GCC-7);
- readiness to work in a team, tolerantly perceive social, ethnic, confessional and cultural differences (GCC-8).

2. A graduate who has mastered a specialist program should have the following general professional competencies:

- willingness to solve standard tasks of professional activity using information, bibliographic resources, biomedical terminology, information and communication technologies and taking into account the basic requirements of information security (GPC-1);
- readiness for communication in oral and written forms in Russian and foreign languages for solving the tasks of professional activity (GPC-

2);

- ability to use the basics of economic and legal knowledge in professional activities (GPC-3);
- ability and willingness to implement ethical and deontological principles in professional activities (GPC-4);
- ability and willingness to analyze the results of their own activities to prevent professional errors (GPC-5);
- readiness to keep medical records (GPC-6);
- readiness to use basic physicochemical, mathematical and other natural science concepts, and methods in solving professional problems (GPC-7);
- readiness for medical use of drugs and other substances, and their combinations in solving professional problems (GPC-8);
- ability to assess morphological and functional, physiological states and pathological processes in the human body to solve professional problems (GPC-9);
- readiness to ensure the organization of patient care and the provision of primary pre-medical health care (GPC-10);
- readiness for the use of medical devices provided for by the procedures for providing medical care (GPC-11).

A graduate who has mastered a specialty program must possess **professional competences** corresponding to the type (types) of professional activity to which the specialty program is directed:

### medical activities:

- ability and readiness to implement a set of measures aimed at preserving and strengthening health and including the formation of a healthy lifestyle, preventing the occurrence and (or) spread of diseases, their early diagnostics, identifying the causes and conditions of their occurrence and development, as well as aimed at eliminating the harmful effects on human health of environmental factors (PC-1);

- ability and readiness to conduct preventive medical examinations, clinical examination and implementation of follow-up observations (PC-2);
- ability and readiness to conduct anti-epidemic measures, organization of protection of the population in the centers of especially dangerous infections, with a deterioration of the radiation situation, natural disasters and other emergency situations (PC-3);
- ability and readiness to use social hygienic methods of collecting and medical-statistical analysis of information on health indicators of the population (PC-4);
- readiness to collect and analyze patient complaints, his/her medical history, examination results, laboratory, instrumental, autopsy and other studies in order to recognize the condition or establish whether the disease is present or not (PC-5);
- ability to determine in a patient the main pathological conditions, symptoms, disease syndromes, nosological forms in a patient in accordance with the International Statistical Classification of Diseases and Health Problems, X revision (PC-6);
- readiness for evaluation of temporary disability, participation in the conduct of medical and social expertise, ascertaining the biological death of a person (PC-7);
- ability to determine the tactics of managing patients with various nosological forms (PC-8);
- readiness for the management and treatment of patients with various nosological forms in outpatient and day hospital conditions (PC-9);
- readiness to provide medical care in case of sudden acute diseases, conditions, exacerbation of chronic diseases that are not accompanied by a threat to the patient's life and do not require emergency medical care (PC-10);

- willingness to participate in the provision of emergency medical care in conditions requiring urgent medical intervention (PC-11);
- readiness to manage physiological pregnancy, childbirth (PC-12);
- readiness to participate in the provision of medical assistance in emergency situations, including participation in medical evacuation (PC-13);
- willingness to determine the need for natural therapeutic factors, drug, non-drug therapy and other methods in patients in need of medical rehabilitation and sanatorium-resort treatment (PC-14);
- readiness to teach patients and their relatives the basic hygiene measures of health-improving nature, skills of self-monitoring of basic physiological indicators that contribute to the preservation and promotion of health, prevention of diseases (PC-15)
- willingness to educate on the elimination of risk factors and the formation of skills for a healthy lifestyle (PC-16);

## organizational and management activities:

- ability to apply basic principles of organization and management in the field of public health, in medical organizations and their structural subdivisions (PC-17),
- willingness to participate in assessing the quality of care with the use of basic medical and statistical indicators (PC-18);
- ability to organize medical care in emergency situations, including medical evacuation (PC-19);

#### research activities:

- readiness for analysis and public presentation of medical information based on evidence-based medicine (PC-20);
- ability to participate in research studies (PC-21);
- willingness to participate in implementation of the new methods and techniques aimed at protecting the health of citizens (PC-22).

#### **1. 1. Requirements for the state examination procedure**

The state final attestation is conducted by the state examination committee in order to determine whether the results of mastering the basic educational program by the students meet the relevant requirements of the federal state educational standard (hereinafter - the standard).

A student, who has no academic debts and fully fulfilled the curriculum or an individual curriculum of the educational program 31.05.01 General medicine (specialty level), is allowed to take the state final certification.

The state final attestation includes preparation for and passing the state exam. The contents of the state exam program is given in Appendix 1.

The goal of the state final attestation is to establish the compliance of the quality of the training received by the students with the requirements of the Federal State Educational Standard for Higher Education of the educational program 31.05.01 General medicine (specialty level), approved by the order of the Ministry of Education and Science of the Russian Federation of 09.02.2016 No. 95, and achievement of the required level of knowledge and skills in the mastered field of study, allowing graduates to successfully cope with the solution of professional problems in the field of medical business.

**Objective** of the state final certification are as follows:

- systematization, consolidation and expansion of theoretical and practical knowledge obtained during studies and their application in solving specific scientific and practical problems;

- clarification of the degree of preparedness of the graduate students for independent practical work or research;

- establishing the degree of development of graduate competencies.

For the state final certification execution, the head of the organization forms the state examination committee.

The State Examination Commission is headed by the chairman (in the absence of the chairman, his deputy). The chairperson (or deputy) of the state

examination commission is selected and approved among the persons who does not work in this organization, have a doctor of science degree and professor of the corresponding profile, heads of health authorities and medical organizations.

The State Examination Commission is formed from: the faculty and research personnel of the organization, as well as persons invited from health authorities, leading teachers and medical scientists.

The chairman and members of the state examination committee are approved by the regulatory act of the organization.

The State Examination Commission is valid for one calendar year.

The State Examination Commission is guided in its activities by this Procedure, the relevant federal state educational standards for the program of specialty in terms of the requirements for the state final certification.

Consultations are held before the state exam in the specialty.

Form of the state exam - oral.

The questions (tasks) of the state exam are made up according to the content of the general medical education program.

Examination tickets must be issued in accordance with the recommended form presented in Appendix 2.

Original tickets must have the appropriate signatures - the department director, the head of the department for professional education, deputy director of school.

Examination tickets must be reviewed and updated annually.

Each examination ticket, as a rule, should contain three questions to check the level of theoretical knowledge and test graduates' skills to apply theoretical knowledge when solving practical issues.

It is recommended making a ticket question design to use the content of the discipline, taking into account the required level of knowledge and skills.

The formulation of examination ticket items is carried out in a narrative form.

One of the main conditions for the preparation of tickets is the establishment of approximately the same volume of examination material, the degree of complexity and complexity of the questions.

The number of tickets required for the exam depends on the size of the group that passes the exam, but no less than 25. At the same time, ticket questions should cover the entire volume provided for the formation of universal and professional competencies of the Federal State Educational Standard of Higher Education.

#### **Requirements for the state examination procedure.**

The duration of preparation for the answer is recommended to be within 60 minutes, the duration of the answer on the ticket of oral exam - within 20 minutes.

It is recommended that there are no more than 5 examinees at the same time in the audience during the state exam, it is not recommended to leave the audience during the exam.

To prepare the answer, the graduate uses exam sheets, which are keeped after taking the exam in a personal file.

Discussion and announcement of the of state examination results by the state examination committee is recommended to be carried out individually for each examinee with a characteristic of the answers. Decisions of the state examination commission are made by a simple majority of votes of the commission members participating in exam evaluation with the mandatory presence of the chairman of the commission or his deputy. With an equal number of votes, the chairman of the commission (or the deputy chairman of the commission who replaces him) has the right to vote.

For each student, the protocol of the state exam pass in the specialty is filled in including ticket questions and additional questions from the members of the state examination board. The protocol of the state examination in the specialty is signed by the members of the state examination commission who attended the exam.

The level of knowledge is graded as "excellent", "good", "satisfactory", "unsatisfactory".

After the meeting of the SEC and registration of the protocols, the results of the state exam are announced to the students. After the state exam, all documents are carried to the archives of the university. Students who have not passed the state final certification in connection with the non-attendance of the state certification test for a valid reason (temporary disability, performing public or state duties, court summoning), have a right to pass it within 6 months after completion of the state final certification. The student must submit to FEFU a document confirming the reason for his absence. Students who did not pass the state attestation test due to failure to appear at the state attestation test due to disrespectful reason or in connection with getting an "unsatisfactory" grade are expelled from FEFU with the issuance of a certificate of study as not fulfilling the duties of conscientious study of the educational program and the implementation of the curriculum.

Persons who has not passed the state final attestation may re-pass the state final attestation not earlier than 10 months and no later than five years after the period of the state final attestation, which has not been passed by a student. This specified person can re-pass the state final certification no more than two times. To re-pass the state final attestation, the mentioned person is reinstated to FEFU for his application for the period of time set by the organization, but not less than the period of time stipulated by the calendar training schedule for the state final attestation in the field of study 31.05.01 General Medicine.

For the students with disabilities, state final certification is carried out at FEFU taking into account the peculiarities of their psychophysical development, their individual capabilities and health status (hereinafter - individual characteristics). During the state final certification, the following general requirements must be met:

• conducting state final attestation for people with disabilities in the same classroom together with students who are not disabled if it does not create

difficulties for people with disabilities and other students in passing the state final attestation;

• the presence in the audience of an assistant (assistants) providing the necessary technical assistance to students with disabilities taking into account their individual characteristics (take a working place, move, read and execute a task, communicate with the chairperson and members of the state examination commission);

• the use of the necessary technical tools for students with disabilities passing the state final certification taking into account their individual characteristics;

• ensuring the possibility of unhindered access of students with disabilities in the classroom, toilets and other rooms as well as their stay in the specified rooms (presence of ramps, handrails, extended doorways, elevators, in the absence of elevators the audience should be located on the first floor, special chairs).

All local regulations of the organization on the issues of the state final certification are communicated to students with disabilities in an accessible form.

According to a written application of a student with a disability, the duration of delivery of a state attestation test to the students with a disability may be increased in relation to the set duration.

Depending on the individual characteristics of the students with disabilities, the organization ensures that the following requirements are met when conducting the state certification tests:

a) for the blind persons:

• tasks and other materials for taking the state attestation test are issued in braille or in the form of an electronic document accessible via a computer with specialized software for the blind persons, or are read by assistant;

• written assignments are done by students in a paper in braille boldface or on a computer with specialized software for the blind persons, or dictated by assistant;

• if necessary, students are provided with a set of pens and writing paper in braille, computer with specialized software for the blind persons;

b) for visually impaired:

• tasks and other materials for taking the state attestation test shall be printed with enlarged font;

• individual uniform illumination of at least 300 lux is provided;

• if necessary, the students are provided with a magnifying device, it is allowed to use magnifying devices possess by students;

c) for the deaf and hard hearing persons as well as for ones with severe speech disorders:

• the availability of sound-amplifying equipment for collective use is ensured; if necessary, students are provided with sound-amplifying equipment for individual use;

• at their request, state certification tests are carried out in writing;

 $\Gamma$ ) for persons with disorders of the musculoskeletal system (severe disorders of the motor functions of the upper limbs or lack of upper limbs):

• written tasks are carried out by students on a computer with specialized software or dictated to an assistant;

• at their request, state certification tests are conducted orally.

Student with disability no later than 3 months before the start of the state final attestation submits a written statement about the need to create special conditions for him/her for the taking of the state attestation tests indicating his/her individual characteristics. Documents confirming that the student has individual peculiarities (in the absence of these documents in the organization) are attached to the application.

In the application student indicates the need (no need) of the presence of assistant at the state certification test, the need (no need) in increased duration of the state certification test in relation to the regularly set duration (for each state certification test).

# 2. The procedure for filing an appeal on the results of the state final certification.

According to the results of state certification tests student has the right to appeal. The graduate has the right to submit to the appeal commission a written appeal form about the violation, according to his/her opinion, of the established procedure the state certification test execution and (or) disagreement with the results of the state examination.

The appeal is submitted personally by students to the appeal commission no later than the next business day after the announcement of the results of the state attestation test.

For consideration of the appeal secretary of the State examination commission sends to the appeal commission the minutes of the meeting of the State examination commission, conclusion of the chairman of the State examination commission on the observance of procedural issues during the state certification testing.

An appeal not later than 2 working days from the date of its submission is considered at a meeting of the appeal commission, to which the chairman of the state examination commission and the student who filed the appeal are invited. The meeting of the Appeal commission may be held in the absence of the student who filed the appeal, if he does not appear at the meeting of the Appeal commission.

The decision of the Appeal commission is provided to the student who filed the appeal within 3 working days from the date of the meeting of the Appeal commission. The fact of familiarization of the student who filed an appeal with the decision of the Appeal commission shall be certified by the student's signature.

When considering an appeal about the violation of the procedure of state certification test execution, Appeal commission makes one of the following decisions:

about rejection of appeal, if the information contained in it concerning violations of the procedure for the student state certification test execution has not been confirmed and (or) did not affect the result of the state certification test;

about approval of appeal, if the information contained in it concerning the violations of the student state certification test procedure were confirmed and affected the result of the state certification test.

If the appeal is approved, the result of the state certification test is subjected to cancellation, and therefore the protocol on the appeal consideration no later than the next working day is submitted to the state examination commission for the implementation of the appeal committee decision. The student is given the opportunity to pass the state attestation test in accordance with the deadlines set in FEFU.

Considering an appeal of disagreement with the results of the state exam Appeal commission makes one of the following decisions:

rejection of the appeal and keeping the result of the state exam;

approval of the appeal and the issuance of different result of the state exam.

The decision of Appeal commission no later than the next working day is submitted to the State examination commission. The decision of Appeal commission is the basis for the cancellation of the previously designated result of the state exam and the issuance of a new one.

The decision of the appeal commission is final and is not subject to revision.

Repeated conduct of a state attestation test of student who has filed an appeal is carried out in the presence of the chairperson or one of the members of Appeal commission no later than the date of completion of study at FEFU in accordance with the standard.

Appeal to re-conduct a state certification test is not accepted.

## 2. Contents of the state exam program

## Form of the state exam - oral.

## The contents of the state exam in the discipline is:

- performing the test tasks;
- demonstration of practical skills;
- answers to exam questions.

The state exam is held in three stages..

- Stage I: test control;
- Stage II: evaluation of practical skills of a specialist;
- Stage III: theoretical interview.

**Questions (tasks) of the state exam** are made up following the content of the educational program "General medicine".

#### First stage of SFA - test exam.

The test exam is carried out according to the standard test tasks, compiled on the basis of a single bank of interdisciplinary attestation tasks for all sections of the IEP in the field of study for 31.05.01 "General Medicine" (specialty level).

The examination for determination of the level of theoretical training of graduates is held simultaneously in the lecture hall. The students receive one of 10 test variants with 100 questions in each version (a brochure with stencils of answers). For **two academic hours** without a break, the graduate solves the test tasks, marking the correctly chosen answer in the paper sheet. When the time is up the answer sheet is submitted to the attestation commission. The results of testing the level of theoretical training are reported to graduates on the day of testing after the registration of the relevant documents.

In accordance with the point-grading system of assessing performance, in order to take into account the contribution of the test exam results to the final SFA score, the test scores are further differentiated according to:

The percentage of correct answers, as well as differentiated assessment are recorded in the SFA consolidated statement of the educational program **31.05.01 "General Medicine"** (specialty level) and in the minutes of meeting of the state certification commission for the final interdisciplinary examination in the field of study.

|                                 | Grade                    |                          |                           |  |
|---------------------------------|--------------------------|--------------------------|---------------------------|--|
| «Unsatisfactory»                | «Satisfactory»           | «Good»                   | «Excellent»               |  |
| Less than 71<br>correct answers | 71-80<br>correct answers | 81-90<br>correct answers | 91-100<br>correct answers |  |
| Less than 71%                   | 71% - 80%                | 81%-90%                  | 91%-100%                  |  |

The result of passing the tests "scored" (71% or more) is an admission to the next stages of the SFA (practical skills, interview). The final decision on admission to the next stage of the SFA of a graduate who has received a "failed" grade (less than 71%), in each case is taken by the chairman of the State examination commission

#### List of topics for preparing for the test

I. Criteria of public health and their definition. The main factors determining the health of the population. Types of prevention, the main objectives and indicators of its effectiveness. Methods for studying public health. The role of medical statistics in studying the health status of various age-sex groups of the population and the activities of the main health care institutions. Accounting forms in the outpatient service. The legal framework for the activities of health authorities and institutions. Health care systems, especially health care in Russia. Basic principles of organization of health care institutions, structure and performance indicators. Features of the doctor in outpatient and inpatient facilities. Medico-social examination. Temporary disability. Disability.

II. Medical ethics. Moral and ethical standards of relationships: doctorpatient, doctor-doctor, doctor - middle and junior medical staff, doctor - relatives of the patient. Health privacy. Responsibility of the doctor for professional violations. Informed patient consent.

III. Age and sex characteristics of the body functioning.

VI. Sanitary-epidemiological patterns of occurrence, development, and spread of diseases.

V. Emergency treatment of various life-threatening conditions..

VI. List of conditions and diseases.

1. Gastroenterology. Diseases of the esophagus (esophagitis, achalasia of the esophagus, ulcerative processes in the esophagus, varicose veins of the esophagus, Barrett's esophagus, esophageal cancer). Diseases of the stomach and duodenum (peptic ulcer, gastric polyposis, gastritis, Mallory-Weiss syndrome, stomach cancer, stomach and duodenal ulcer bleeding, Zollinger-Ellison

59

syndrome). Intestinal diseases (acute enteritis, acute and chronic colitis, pseudomembranous colitis, ulcerative colitis, Hirschsprung disease, Crohn's disease, diverticulitis and colon diverticulitis), surgical diseases of the colon and rectum. Cancer of colon and rectum. Hemorrhoids. Paraproctitis. Appendicitis (acute, chronic, complications, atypical forms). Meckel's diverticulitis. Hernia of the anterior abdominal wall. Methods of diagnostics of gastrointestinal diseases.

2. Pulmonology. Acute inflammatory diseases of the respiratory tract. COPD. Bronchial asthma. Allergic diseases of the lungs. TELA. Lung infarction. Pleurisy. Pulmonary tuberculosis. Lung cancer. Pulmonary hemorrhage and hemoptysis. Methods for diagnostics of the respiratory system diseases.

3. Cardiology and vascular diseases. Coronary heart disease. Myocardial infarction. Inflammatory diseases of the heart and pericardium. Heart defects. Heart failure. Electrocardiography. Methods of diagnosis of diseases of the cardiovascular diseases Arterial hypertension. Atherosclerosis and hypercholesterolemia. Venous diseases.

4. Diseases of the hepatobiliary system. Hepatitis. Liver cirrhosis. Badda-Chiari Syndrome. Portal hypertension. Portocaval and cavaval anastomoses. Biliary hypertension. Jaundice and hyperbilirubinemia. Cholelithiasis. Liver cysts. Cholecystitis. Liver cancer. Cancer of the gallbladder. Vascular tumors of the liver. Acute and chronic pancreatitis. Pancreatic cysts. Pancreas cancer.

5. 5Diseases of the urogenital sphere. Urolithiasis disease. Injuries to the kidneys and urinary tract. Urinary retention. BPH. Bladder cancer. Kidney cancer. Prostate cancer.

6. Principles of organization of oncological service. Skin tumors, skin appendages. Breast cancer.

7. Diseases of the musculoskeletal system. Dislocations. Fractures. Injuries and degenerative diseases of spine. Inflammatory diseases of bones and joints. Bone tumors. Organization of trauma treatment.

8. Inflammatory diseases of the connective tissue.

9. Epidemically significant infectious diseases.

60

- 10. Skin and venereal diseases
- 11. 1Hematology and transfusiology.
- 12. Pediatrics.
- 13. Diseases of the nervous system.

14. Diseases of the endocrine system. Diseases of the thyroid gland. Diabetes. Surgical complications of diabetes. Diseases of the pituitary gland. Adrenal gland diseases.

15. 15. Obstetrics and gynecology. Physiological pregnancy. Fetal development during pregnancy. Childbirth. Inflammatory diseases of the female genital organs. Uterine bleeding. Uterine fibroids. Cervical cancer. Uterine cancer. Ovarian cancer.

#### Stage II - assessment of practical skills of a specialist

For the second stage of the SFA - checking the level of the practical skills mastering, the "theme" patients are selected so that they can assess the level of knowledge on therapy, surgery, obstetrics and gynecology. The list of practical skills in therapy, surgery, obstetrics and gynecology is given in the guidelines for graduates for preparation to the GIA.

The graduate is offered a patient to solve a professional task - examination, diagnosis, determination of treatment tactics. The answer is issued in the form of a mini-medical history. At the same stage, practical skills are evaluated using simulators, phantoms, medical equipment and instruments; ability of the graduate to interpret radiographs, ECG, laboratory data is taken into account.

The result of passing practical skills ("satisfactory" or higher) is an admission to the next stage of the SFA.

| Evaluation scale | Evaluation criteria                                      |
|------------------|--|
| «Excellent»      | the workplace is equipped with all the requirements for  |
|                  | the preparation to perform the manipulations; practical  |
|                  | actions are performed sequentially, in accordance with   |
|                  | the algorithm for performing manipulations; all safety   |
|                  | requirements for a patient and the medical staff are     |
|                  | met; the time limit is maintained in accordance with the |
|                  | action algorithm; the workplace is cleaned in            |
|                  | accordance with the requirements of the sanitary         |
|                  | epidemiological regime; all actions are justified        |
| «Good»           | There are minor difficulties with the equipment of the   |
|                  | workplace, compliance with all training requirements     |
|                  | for performing manipulations; The student basically      |
|                  | correctly and consistently performs practical actions,   |
|                  | complies with the algorithm for performing               |
|                  | manipulations; requirements for the safety of a patient  |
|                  | and the medical staff; maintains the time limit in       |
|                  | accordance with the action algorithm; the workplace      |
|                  | cleans in accordance with the requirements of the        |
|                  | sanitary epidemiological regime; all actions are         |
|                  | justified.   |
| «Satisfactory»   | There are minor difficulties with the equipment of the   |
|                  | workplace, compliance with all training requirements     |
|                  | for performing manipulations; student has difficulty     |
|                  | with the correctness and consistency of the              |
|                  | implementation of practical actions, basically observes  |
|                  | the algorithm for performing manipulations;              |
|                  | requirements for the safety of a patient and the medical |

# Criteria for evaluating the results of the practical skills' mastering

|                  | staff; basically maintains the time limit in accordance  |  |  |  |  |  |
|------------------|--|--|--|--|--|--|
|                  | with the algorithm of actions; the workplace is cleaned  |  |  |  |  |  |
|                  | in accordance with the requirements of the sanitary      |  |  |  |  |  |
|                  | epidemiological regime; There are some difficulties in   |  |  |  |  |  |
|                  | justifying their actions.                                |  |  |  |  |  |
| «Unsatisfactory» | difficulties with the preparation of the workplace, the  |  |  |  |  |  |
|                  | inability to independently perform practical             |  |  |  |  |  |
|                  | manipulations; actions are taken violating the safety of |  |  |  |  |  |
|                  | a patient and medical staff, violate the requirements of |  |  |  |  |  |
|                  | the sanitary epidemiological regime, safety measures     |  |  |  |  |  |
|                  | when working with the equipment, the materials used.     |  |  |  |  |  |

The decision on admission of a student who has not passed the second stage of attestation tests ("unsatisfactory stage") to the third in each case is taken by the chairman of the State examination commission.

The third stage of the SFA. The aim of this stage is assessing the ability to solve specific professional tasks by an oral examination-interview. Graduates are provided with the entire list of diseases and conditions included in the exam tickets for 6 months before the beginning of state certification (given in the guidelines for graduates to prepare for the SFA).

Typical situational tasks for therapy, surgery, obstetrics and gynecology, and related clinical disciplines are drawn up at the graduating department of the School of Biomedicine in accordance with the list of conditions and diseases specified in the "Work Program of the State Final Attestation of Graduates in the field of study 31.05.01" General Medicine ", specialty), approved by the relevant methodological commissions and the deputy director of the School of Biomedicine for educational work. The interview is carried out using tickets.

#### **Ticket structure:**

The first question is the situational task on therapy.

The second question is the situational task on surgery.

The third question is the situational task on obstetrics and gynecology.

Three examiners (therapist, surgeon, obstetrician-gynecologist) and a member of the State Examination Board (SEC) assess the graduate's knowledge.

The third stage of state certification is carried out within one day, 100 tickets for therapy, surgery and obstetrics are used, the set of tasks is not repeated. In preparing for the exam, the student takes notes in the oral answer sheet. At the end of the answer, the sheet with the oral answers signed by student is submitted to an examiner. During the interview, members of the examination committee assess the integrity of the graduate's professional training, that is, the level of competence in using the theoretical basis for solving professional problems.

| Answer characteristics   | Grade       |
|--|-------------|
| A full, detailed answer to the question is given, the            |             |
| ability to identify essential and insignificant signs, cause-    |             |
| and-effect relationships is shown. The answer is clearly         |             |
| structured, logical, set out in literary language in terms of    | «Excellent» |
| science. There may be mistakes or minor errors corrected by      |             |
| the student with the help of a teacher.                          |             |
|  |             |
| A complete but insufficiently consistent answer to the           |             |
| question is given, but it shows the ability to distinguish       |             |
| essential and insignificant signs and cause-effect               |             |
| relationships. The answer is logical and stated in terms of      | «Good»      |
| science. 1-2 errors in the definition of basic concepts that the |             |
| student is difficult to correct on his/her own can be made.      |             |
|  |             |

| An incomplete answer is given, the logic and sequence         |                  |
|---|------------------|
| of presentation have significant violations. There were gross |                  |
| errors in determining the essence of the disclosed concepts,  |                  |
| theories, phenomena, as a result of a student's               |                  |
| misunderstanding of their essential and non-essential         | «Satisfactory»   |
| features and connections. There are no conclusions in the     |                  |
| answer. The ability to reveal specific manifestations of      |                  |
| generalized knowledge is not shown. Speech design requires    |                  |
| amendments, correction.                                       |                  |
| answers on basic issues of discipline are not received.       | «Unsatisfactory» |

The grade on the SFA is registered in the minutes of the meeting of the State examination commission during conduction of the final interdisciplinary exam in the field of study 31.05.01 "General Medicine" (specialty level).

The results of certification are announced to graduates on the same day after the registration and approval of the minutes of the State examination commission meeting.

# **INSTRUCTION**

for performing a test task (for graduates)

Vladivostok 2019

You have received a variant of the test task and the personal answer paper.

On the personal paper indicate: surname, name, patronymic, specialty of study and the variant number of the test task.

Use only blue ballpoint pen.

Marking the fields of the test task is not allowed

The test task contains 100 questions. In each of them there are several variants of answers, only one of which is correct and most fully meets all the conditions of the question.

Be careful when reading the statement of the task and choosing the answer. You must select one answer that most closely matches the conditions of the problem, or one wrong answer among the correct ones.

Pay attention to the keywords "always", "never", "most", "all signs are characteristic, except ...", "... except ...", "what is not typical for ...", medical suffixes and prefixes of the type "hyper-," "hypo-," "-it," the sex and age of the patient, and concomitant diseases.

Select the answer selection that best fits the conditions of the task, and write its number into the appropriate cell of the answer paper.

Do not leave any question unanswered. Marking of more than one option or the absence of a mark cannot be counted as the correct answer.

During testing, students do not have the right to communicate with each other, move freely around the audience, use mobile phones or other means of communication, electronic computing equipment and reference materials.

In case of violation of the procedure for conducting testing or refusal to comply with it, the chairman of the SFA has the right to remove a student from testing with the following act filling.

There are members of the State examination commission present in the audience during the work of students with test tasks.

67

The duration of the test is 2 hours. After the testing time expired, the chairman of the SFA announces the end of testing, collects test materials from graduates.

Verification of the test tasks is carried out by members of the State examination commission in the presence of the chairman of the SFA.

Test results are evaluated as follows:

• 71% or more of the correct answers are "passed";

• less than 70% of correct answers - "failed".

Do not be discouraged if you come across a "bad" or "difficult" question of the test task. You can return to it after answering other questions.

SCHOOL OF BIOMEDICINE

**Department of clinical medicine** 

STATE FINAL CERTIFICATION Education program Specialty 31.05.01 «General medicine»

Form of study: full time

REQUIRED LIST OF PRACTICAL KNOWLEDGE AND SKILLS to prepare for the second stage of SFA

## PRACTICAL SKILLS ON THERAPY

After completing classes in internal medicine, the graduate should be able to:

- 1. *I. Examine the patient* (history taking, external examination, percussion and auscultation of the lungs, heart, examination and palpation of the abdomen, etc.)
- 2. Evaluate:

2.1. identified changes in the various systems and organs during the examination;

2.2. peripheral blood counts (hemoglobin, white blood cell count and leukocyte count are normal, with acute leukemia, chronic myeloid and lymphatic leukemia, platelet count, reticulocyte count)

2.3. biochemical blood tests:

a) the content of total protein and its fractions,

b) liver and cardiac enzyme activity,

c) urea and creatinine,

d) indicators of the activity of the inflammatory process (C-reactive protein, fibrinogen, etc.) and streptococcal infection (ASL-0,

AST)

e) lipid metabolism (cholesterol, triglycerides, HDL, LDL),

f) pigment metabolism,

g) purine exchange rates.

2.4 The main coagulogram indicators (prothrombin time, APTT, fibrinogen, bleeding time);

1.1 clinical significance of electrolyte and acid-base blood balance;

2.6 The practical significance of a general urinalysis, urine tests according to Nechyporenko, Zimnitsky and Reberg test

2.7 The clinical significance of changes in urine bile pigments, urobilin, diastase;

2.8 Clinical and bacteriological analysis of sputum and know its diagnostic and differential diagnostic value;

2.9 the practical significance of the data obtained in the study of respiratory function;

2.10 use for the diagnosis of radiographs of the skull and spine.

## 3. Interpret and use modern diagnostic methods for diagnostics:

a) bicycle ergometry,

b) echocardiography

c) Ultrasonography of the abdominal organs (liver, pancreas, kidneys, gall bladder),

d) ECG

e) daily ECG monitoring,

f) daily blood pressure monitoring,

g) hormonal blood parameters in the most common endocrine diseases.

# 4. Read radiographs and tomograms of the lungs.

5. Use:

5.1. data of physical, instrumental, X-ray examination, laboratory data for diagnostics in outpatient and inpatient conditions;

5.2. indications and contraindications for referral of patients with the most common chronic therapeutic diseases to SPA-resort treatment.

# 6. Examine patients and recognize diseases:

- a) peripheral nervous system;
- b) focal brain lesions;
- c) volumetric processes in the brain;
- d) damage to the meninges.

# 7. To conduct examination of the patient:

- 7.1. with focal and disseminated lung disease;
- 7.2. with pain in the heart;
- 7.3. with cardiac murmurs and cardiomegaly;

7.4. with myocardium infarction;

- 7.5. with abnormal urinary sediment;
- 7.6. with hepatomegaly and hepatolienal syndrome;

- 7.7. with jaundice;
- 7.8. with acute abdomen syndrome;
- 7.9. with esophageal, gastric, intestinal dyspepsia;
- 7.10. with pulmonary and esophageal-gastrointestinal bleeding;
- 7.11. lymphadenopathy and splenomegaly;
- 7.12. with hemoblastosis;
- 7.13. with coma;
- 7.14. with a swoon;
- 7.15. with swelling;
- 7.16. with fever.

#### 8. Conduct examination and treatment of the patient:

- 8.1. with diseases of impaired bronchial patency;
- 8.2. with violation of heart rate and conduction;
- 8.3. with acute and chronic heart failure;
- 8.4. with hypertension and hypotension;
- 8.5. with nephrotic syndrome;
- 8.6. with damage to the joints;
- 8.7. with systemic connective tissue diseases;
- 8.8. with diseases of the biliary tract and pancreas;
- 8.9. with anemia;
- 8.10. with hemorrhagic syndrome;

8.11. with diseases manifested by hypothyroidism and thyrotoxicosis;

- 8.12. with menopausal syndrome;
- 8.13. with shock;
- 8.14. with drug disease.

#### 9. 9. Diagnose and treat:

- 9.1. diabetes in patients with various diseases of internal organs;
- 9.2. DIC syndrome.

#### 10. 10. Assign and conduct:

10.1. anti-inflammatory and immunosuppressive therapy;

- 10.2. antibiotic therapy;
- 10.3. anticoagulant and thrombolytic therapy.
- 11. To provide qualified medical care for the most common emergency situations in practice: hypertensive crisis, bronchial asthma attack, pulmonary embolism, anginal status, cardiac asthma and pulmonary edema, cardiogenic shock, lifethreatening rhythm and conduction disorders, acute renal and hepatic colic, acute pancreatitis, coma with diabetes, anaphylactic shock, pulmonary, esophageal-gastrointestinal bleeding.
- 12. Choose the best treatment option, prescribe drug therapy, taking into account the pharmacokinetics and pharmacodynamics of drugs, preventing their unwanted side effects; recommend non-drug therapy.
- 13. To draw up a rehabilitation program for the patient at the hospital and outpatient units, to monitor its implementation.
- 14. To determine the fact of temporary disability, its cause, the criteria for recovery and rehabilitation.
- 15. Determine the indications for employment, the establishment of a group of disability and its prediction.
- 16. To issue the main documents on the examination of working capacity.
- 17. Timely and correctly recognize the borderline pathology encountered in the of the therapist practice:
- a) the most common infectious diseases and especially dangerous infections;
- b) mental disorders;
- c) endocrine system diseases;
- d) tuberculosis;
- e) ENT diseases;
- f) "acute abdomen".

18. To carry out sanitary and educational work, to make its plan.

19. Make written prescriptions, prescriptions for narcotic, drug-containing and equivalent drugs.

20. Organize clinical examination at the site, to assess its effectiveness, to draw up a plan of preventive measures, to conduct an analysis of morbidity with temporary disability.

21. Manage the work of nursing staff in the hospital and clinic.

## PRACTICAL SKILLS IN SURGERY

Collection and evaluation history.

Measurement and evaluation of blood pressure, heart rate and respiration per minute in a patient.

Evaluation of test results: clinical and biochemical. Blood grouping by ABO and Rh.

Performing tests on individual compatibility of blood of the donor and the patient; the suitability of blood, blood substitutes, other solutions for transfusion.

Evaluation of the results of instrumental research methods:

- ultrasound scan;
- gastric and duodenal sounding;
- adiographic examination;
- bronchoscopy and bronchography;
- lumbar, sternal, pleural puncture.

1. Preparing the patient for radiographic and ultrasound examination of the gastrointestinal tract, urinary system; endoscopic examination of the gastrointestinal tract and respiratory organs.

2. Perform a digital rectal exam.

3. Assessment of pathological changes identified during the examination of the patient and the formation of a preliminary diagnosis.

4. Justification of etiological, pathogenetic and syndrome therapy in patients with various pathological conditions.

5. Stop external bleeding by applying a pressure bandage.

6. Treatment of pressure sores.

7. Perform injections of drugs (i/v, i/m, s/c, i/c), calculation of doses and dilutions of drugs.

8. Preparing the system for intravenous infusion and performing intravenous transfusion.

9. Preparation of a set of tools, materials, medicines and the primary surgical treatment of wounds.

10. Apply a bandage to all areas of the body.

11. Dressing clean and purulent wounds. The imposition of bactericidal dressings.

12. Use of an individual dressing package.

13. The imposition of an elastic bandage on the lower limb.

14. Perform indirect heart massage. Demonstration of the operation of the defibrillator.

15. Perform ALV by mouth-to-mouth, mouth-to-nose, Ambu's bag.

16.1Providing emergency care:

- esophagus burns;
- shock of different genesis;
- hyperthermia;
- DIC;
- acute allergic reactions;
- an attack of renal colic;
- bites by animals, snakes and insects.

Extract and registration of prescriptions, including concessions, for narcotic and equivalent drugs.

Keeping standard medical records. Organization of the work of the nursing post.

## PRACTICAL SKILLS ON OBSTETRICS AND GYNECOLOGY

Student must be able to:

• collect general and special history, conduct general and special obstetric examinations;

• establish duration of pregnancy, determine the estimated mass of the fetus, position of the fetus in the uterus, type of presentation;

• based on the analysis of information received, make a preliminary diagnosis, identify risk factors for obstetric complications;

• take the contents of the vagina for cytological and bacteriological examination;

• evaluate the results of basic laboratory tests (urinalysis, blood, vaginal smear);

- identify signs of separation of the afterbirth;
- determine the approximate volume of blood loss;
- conduct an external massage of the uterus after childbirth;
- on the phantom to give birth in the main presentation;
- process the umbilical cord;

Age\_\_\_\_

- on the phantom carry out an operation of manual separation of the placenta and the allocation of the placenta;
- evaluate the genital involution in the postpartum period;
- diagnose the main forms of postpartum maternal diseases.

#### STATE CERTIFICATION - II STAGE - PRACTICAL SKILLS

| Student full name, |            |  |
|--------------------|------------|--|
| group              |            |  |
| Base               | Department |  |
| Student full name. |            |  |

#### QUESTIONING

**Complains:** (more detail should be deciphered complaints that define the disease and its complications)

|  | <br> |  |
|--|------|--|
|  |      |  |
|  |      |  |
|  |      |  |
|  |      |  |
|  |      |  |

**History of the disease:** (note the onset of the disease, its dynamism, the occurrence and nature of complications, the effectiveness of the therapy)\_\_\_\_\_\_

|   | <br> | <br> |
|---|------|------|
|   |      |      |
|   | <br> | <br> |
|   |      |      |
|   |      |      |
|   |      | <br> |
|   |      |      |
|   | <br> | <br> |
|   |      |      |
|   | <br> | <br> |
|   |      |      |
|   |      | <br> |
|   |      |      |
|   |      |      |
|   |      | <br> |
|   |      |      |
|   | <br> | <br> |
|   |      |      |
|   | <br> | <br> |
|   |      |      |
|   |      |      |
|   |      |      |
|   |      |      |
|   | <br> | <br> |
|   |      |      |
|   | <br> | <br> |
|   |      |      |
|   | <br> | <br> |
|   |      |      |
|   |      |      |
|   |      |      |
|   |      |      |
|   | <br> | <br> |
| - |      |      |
|   |      |      |

**Anamnesis of life:** (note the professional route, heredity, injuries, surgeries, bad habits, malnutrition, physical exercise, etc.)

## **Department of clinical medicine**

## STATE FINAL CERTIFICATION

Education program

Specialty 31.05.01 «General medicine»

Form of study: full time

## THEMES OF EXAMINATION TASKS

## THEMES OF EXAMINATION TASKS ON THERAPY

- 1. Pituitary adenoma
- 2. Anemia.
- 3. Aortic heart disease (aortic stenosis).

4. Atherosclerosis (Obliterating atherosclerosis of vessels of the lower limbs).

- 5. Autoimmune thyroiditis.
- 6. Diseases of the esophagus (GERD).
- 7. Bronchial asthma.
- 8. Bronchitis.
- 9. Bronchiectasis.
- 10. Gastritis.
- 11. Hemorrhagic diathesis.
- 12. Hypothalamic syndrome.
- 13. Hypothyroidism.
- 14. Diffuse toxic goiter.
- 15. Myocardial infarction.
- 16. Infective endocarditis.
- 17. Ischemic heart disease (acute coronary syndrome).
- 18. Ischemic heart disease (exertional angina)
- 19. Cardiomyopathy.
- 20. Myocarditis.
- 21. Mitral heart disease.
- 22. Urolithiasis.
- 23. Heart rhythm disorder.
- 24. Ulcerative colitis.
- 25. Nephrotic syndrome.
- 26. Obesity.
- 27. Osteoarthrosis.

- 28. Acute rheumatic fever.
- 29. Acute glomerulonephritis.
- 30. Acute leukemia.
- 31. Paroxysmal rhythm disturbances.
- 32. Pericarditis.
- 33. Pleurisy.
- 34. Gout.
- 35. Pneumonia.
- 36. Lung cancer.
- 37. Rheumatic disease.
- 38. Rheumatoid arthritis.
- 39. Diabetes mellitus type I.
- 40. Diabetes mellitus type II.
- 41. Symptomatic arterial hypertension.
- 42. Irritable bowel syndrome.
- 43. Syndrome / Itsenko-Cushing disease.
- 44. Systemic lupus erythematosus.
- 45. Systemic scleroderma.
- 46. Thyrotoxicosis.
- 47. COPD (bronchitis variant).
- 48. Chronic adrenal insufficiency (Addison's disease).
- 49. Chronic renal failure.
- 50. Chronic heart failure.
- 51. Chronic leukemia.
- 52. Chronic glomerulonephritis.
- 53. Chronic calculous cholecystitis, cholelithiasis.
- 54. Chronic pancreatitis.
- 55. Chronic pyelonephritis.
- 56. Cirrhosis of the liver.
- 57. Essential arterial hypertension (hypertensive illness).

58.Peptic ulcer and duodenal ulcer.

#### THEMES OF EXAMINATION TASKS IN SURGERY

- 1. Aortic aneurysm.
- 2. Arthritis.
- 3. Diseases of the stomach surgery.
- 4. Crohn's disease.
- 5. Varicose veins of the lower extremities.
- 6. Sudden cardiac arrest.
- 7. Ascending thrombophlebitis.
- 8. Congenital heart defects.
- 9. Acute and chronic hemorrhoids.
- 10. Blood transfusion shock.
- 11. Purulent mastitis.
- 12. Purulent mediastinitis.
- 13. Diaphragmatic hernia.
- 14. Gallstone disease.
- 15. Diseases of the esophagus, accompanied by dysphagia.
- 16. Diseases of the rectum.
- 17. Diseases simulating acute abdomen.
- 18. Closed chest injury.
- 19. Infectious toxic shock.
- 20. Intestinal obstruction.
- 21. Crash syndrome.
- 22. Treatment of purulent wounds.
- 23. Mechanical jaundice.
- 24. Urolithiasis.
- 25. Obliterating atherosclerosis.
- 26. Obliterating endarteritis, thromboangiitis.
- 27. Gunshot wounds.

- 28. Burns, burn shock.
- 29. Tumors of the pancreatoduodenal zone.
- 30. Tumors of the kidneys and bladder.
- 31. Thyroid tumors.
- 32. Organization of the work of the surgical department (office) clinic.
- 33. Osteomyelitis.
- 34. Acute urinary retention.
- 35. Acute damage to the lungs.
- 36. Acute purulent diseases of the skin and subcutaneous tissue.
- 37. Acute gastrointestinal bleeding.
- 38. Acute appendicitis.
- 39. Acute mesenteric thrombosis.
- 40. Acute pancreatitis.
- 41. Acute venous thrombosis. Pulmonary artery thrombembolia.
- 42. Acute cholecystitis.
- 43. Frostbite.
- 44. Ophthalmoplegia.
- 45. Parasitic liver diseases.
- 46. Inguinal hernia.
- 47. Fracture of the pelvic bones.
- 48. Fractures of the lower and upper extremities.
- 49. Rib fractures, pneumothorax.
- 50. Peritonitis.
- 51. Perforated ulcer.
- 52. Subphrenic abscesses.
- 53. Postcholecystectomy syndrome.
- 54. Postinjection complications.
- 55. Renal colic.
- 56. Acquired heart defects.
- 57.Perforated duodenum ulcer.

- 58. Penetrating chest injury.
- 59. Gastric cancer.
- 60. Liver cancer.
- 61. Esophageal carcinoma.
- 62. Colon cancer.
- 63. Cancer Fatter nipple.
- 64. Resuscitation in drowning.
- 65. Cicatricial narrowing of the esophagus.
- 66. Diabetes mellitus, diabetic foot.
- 67. Sepsis.
- 68. Syndrome of the superior vena cava.
- 69. Syndrome of multiple organ failure.
- 70. Syndrome of portal hypertension.
- 71. Afferent loop syndrome.
- 72. Modern principles of treatment of coronary artery disease.
- 73. Terms of disability in the most common surgical diseases.
- 74. Stenosis of the mitral and aortic valves.
- 75. Tetanus.
- 76. Colonic fistula.
- 77. Spinal injuries.
- 78. Strangulated hernia.
- 79. Phlegmon.
- 80. Surgical care at home.
- 81. Surgical sepsis.
- 82. Chronic venous insufficiency (varicose veins, PTFS).
- 83. Chronic occlusive aortic and arterial lesions.
- 84. Chronic pancreatitis. Cysts and pancreas fistula.
- 85. Liver cirrhosis.
- 86. Embolism and acute thrombosis of the aorta and arteries.
- 87. Empyema, pleurisy.

88. Gastric ulcer.

# THEMES OF EXAMINATION TASKS ON OBSTETRICS AND GYNECOLOGY

- 1. Anatomically and clinical narrow pelvis.
- 2. Anemia and pregnancy.
- 3. Ovary apoplexy.
- 4. Infertility.
- 5. Community-acquired abortion.
- 6. Ectopic pregnancy.
- 7. Defect of the placenta.
- 8. Discoordinated labor activity.
- 9. LUB.
- 10. Climacteric syndrome.
- 11. Bleeding in premenopausal, postmenopausal.
- 12. Cervical leukoplakia.
- 13. Mastitis.
- 14. Mastopathy.
- 15. Uterine body fibroids.
- 16. Suppuration of the seams of the perineum.
- 17. Began spontaneous miscarriage.
- 18. Insolvent scar on the uterus.
- 19. OPG gestosis (severe, preeclampsia, eclampsia).
- 20. Ovarian tumor.
- 21. Acute colpitis.
- 22. Acute endometritis.
- 23. Turn of the ovarian tumor leg.
- 24. Pyelonephritis and pregnancy.
- 25. Polyp endometrium.
- 26. PONRP.

- 27. Heart defects and pregnancy.
- 28. Postpartum metroendometritis.
- 29. Placenta previa.
- 30. Preterm labor.
- 31. Uterine rupture on the scar.
- 32. Born fibromatous node.
- 33. Weakness of labor.
- 34. Pelvic presentation of the fetus.
- 35. Trophoblastic disease.
- 36. Tubo-ovarian education.
- 37. Threatened miscarriage.
- 38. Threatened and completed uterine rupture.
- 39. Threatening spontaneous abortion.
- 40. Physiological childbirth.
- 41. Chronic endometritis.
- 42. CFPF.
- 43. Partial tight attachment of the placenta.
- 44. Cervical dystocia.
- 45. Ectopia of the cervix.
- 46. Juvenile bleeding.

## THEMES OF EXAMINATION TASKS ON EYE DISEASES

- 1. Age-related cataract.
- 2. Hypertensive angioretinopathy.
- 3. Purulent corneal ulcer.
- 4. Diabetic angioretinopathy.
- 5. Closed angle glaucoma.
- 6. Vitreous hemorrhage, diabetic angioretinopathy.
- 7. Tumors of orbit.

- 8. Acute adenoviral conjunctivitis.
- 9. Acute allergic conjunctivitis.
- 10. Acute dacryadenitis.
- 11. Open-angle glaucoma.
- 12. Retinal detachment.
- 13. Complete thrombosis of the central retinal vein.
- 14. Wound of the century, eye contusion.
- 15. Toxic neuritis of the optic nerve.
- 16. Orbital phlegmon.
- 17. Chemical conjunctiva and cornea burns.

## THEMES OF EXAMINATION TASKS ON INFECTIOUS DISEASES

- 1. Botulism.
- 2. Typhoid fever.
- 3. HIV infection.
- 4. Hepatitis.
- 5. Dysentery.
- 6. Tick-borne encephalitis.
- 7. Malaria.
- 8. Meningococcal infection.
- 9. SARS, flu.
- 10. Food toxicoinfections.
- 11. Erysipelas.
- 12. Salmonellosis.
- 13. Anthrax.
- 14. Typhus.
- 15. Cholera.
- 16. Plague.

## THEMES OF EXAMINATION TASKS ON ENT-DISEASES

- 1. Vasomotor rhinitis. Vasotomy.
- 2. Bilateral tubootitis.
- 3. Lacunar angina. Antibacterial, local and symptomatic therapy.
- 4. Acute suppurative otitis media.
- 5. Acute right-sided purulent sinusitis.
- 6. Acute right-sided purulent sinusitis with neuralgia.
- 7. Acute ethmoiditis.
- 8. Paratonsillar abscess.
- 9. Larynx cancer.
- 10. Follicular tonsillitis.
- 11. Chronic mesotympanic.
- 12. Chronic epitimpanitis with cholesteatoma.

#### THEMES OF EXAMINATION TASKS ON NERVOUS DISEASES

- 1. Brain abscess.
- 2. Parkinson's disease.
- 3. Herpetic ganglioneuropathy.
- 4. Purulent meningitis.
- 5. Ischemic stroke, transient ischemic attack.
- 6. Brain hemorrhage.
- 7. Myasthenia.
- 8. Migraine.
- 9. Myelitis
- 10. Neuralgia of the trigeminal nerve.
- 11. Neuropathy of the median, radial nerve.
- 12. Brain and spinal cord tumors.
- 13. Osteochondrosis of the cervical, lumbar.
- 14. Acute cerebrovascular accident.

- 15. Polyneuropathy: diabetic, alcoholic.
- 16. The defeat of the nervous system with syphilis.
- 17. Multiple sclerosis.
- 18. Rheumatic chorea.
- 19. Syringomyelia.
- 20. Subarachnoid hemorrhage, cerebral aneurysm.

21. Traumatic brain injury: concussion, contusion, compression, consequences.

22. Epilepsy, status epilepticus.

## THEMES OF EXAMINATION TASKS ON PHTHISIATRY

- 1. Hyperreactive Mantoux probe.
- 2. Infiltrative tuberculosis.
- 3. Cavernous tuberculosis.
- 4. Caseous pneumonia.
- 5. Miliary tuberculosis.
- 6. Focal tuberculosis.
- 7. Primary infection. Virage tuberculin tests.
- 8. Primary tuberculosis complex.
- 9. Subacute disseminated tuberculosis.
- 10. Post-vaccination anti-TBI-lymphadenitis.
- 11. Early tuberculous intoxication.
- 12. Sarcoidosis of intrathoracic lymph nodes.
- 13. Silicotuberculosis.
- 14. Tuberculosis of intrathoracic lymph nodes.
- 15. Tuberculous meningitis.
- 16. Tuberculoma.
- 17. Fibrous-cavernous tuberculosis.
- 18. Chronic disseminated tuberculosis.
- 19. Cirrhotic tuberculosis.

# 3. Recommendations for students in preparation for the state final certification

In preparation for the state exam, the graduate must first pass a preliminary test in the computer class, work out practical skills in the simulation center and get advice on theoretical issues from the teacher.

Appendix 4
