WORKING PROGRAM OF PRACTICE
General Professional Medical Training
31.05.01 Лечебное дело
General Medicine (на английском языке)
Form education: full time

Director of department PhD, associate professor Tyan K.V.

Date of the meeting 14.05.2024 № protocol 6

Compliers:

MD, professor , Usov V.V.; PhD, associate professor, Korableva E.V.

Vladivostok
2024

I. GOALS OF THE PRACTICE

Goal:

The purposes of the internship are: professional and practical training of students, focused on deepening theoretical training and consolidating students' practical skills and competencies in caring for patients; consolidation and deepening of theoretical training, the acquisition of skills necessary in the work of a ward nurse; mastering the duties of a ward nurse, learning how to independently perform some medical procedures and manipulations of a ward nurse, gaining work experience in a real medical team; use of medical equipment and tools, experience of independent professional activity in the scope of work of a ward nurse through direct participation in the activities of a hospital, as well as the development of competencies necessary for work in the professional field.

II. OBJECTIVES OF THE PRACTICE

Objectives:

1. consolidation and deepening of knowledge about the main stages of the work of nursing staff, duties and responsibilities in working with patients with diseases of various organs and systems from the standpoint of nursing staff in different departments of a multidisciplinary hospital;
2. mastering the principles of caring for patients of varying degrees
3. severity and sanitization rules; organization of the work of the nursing post of the therapeutic, surgical, resuscitation, admission departments; duties of a nurse;
4. formation of abilities to organize the work of medical personnel in medical organizations, the definition of functional responsibilities and the optimal algorithm for their implementation;
5. formation of abilities to organize measures for labor protection and safety, prevention of occupational diseases, monitoring compliance with and ensuring environmental safety;
6. mastering the basic principles of medical ethics and deontology, carrying out sanitary and educational work among patients, familiarization with the basics of the organization and work of nursing staff;
7. mastering the methods of administering drugs (intramuscular, subcutaneous injections);
8. formation of the student's communication skills

III. THE PLACE OF PRACTICE IN THE STRUCTURE OF THE EDUCATIONAL PROGRAM

General Professional Medical Training It is a mandatory part of block 2 of the curriculum practice (index B2.O.06(II))

General Professional Medical Training total labor intensity 252 hour. (7 credits) it takes place in the 10 semester and is mandatory.

IV. ТИПЫ, СПОСОБЫ, МЕСТО И ВРЕМЯ ПРОВЕДЕНИЯ ПРАКТИКИ

Kind of practice - Производственная

Type of practice - General Professional Medical Training

The method of conducting the practice - стационарная

In accordance with the schedule of the educational process, the educational practice is implemented in 10 semester.

V. THE COMPETENCIES OF THE STUDENT FORMED AS A RESULT OF THE INTERNSHIP

General professional competencies of students, indicators of their achievements and learning outcomes in the discipline

The code and name of the competence (the result of mastering)	The code and name of the competence achievement indicator	The name of the assessment indicator (the result of training in the discipline)
GPC-10 Is able to understand the principles of modern information technologies and use them to solve the tasks of professional activity	GPC-10.1 Is able to use modern information and communication tools and technologies in professional activities	Knows: communicative styles of communication in the state and foreign languages; technologies for searching for necessary information in the process of solving various communicative tasks in the state and foreign languages; technology for translating academic texts from a foreign language into the state language. Can: use information and communication technologies when searching for the necessary information Owns: communication skills in oral and written forms in Russian and foreign languages in professional activities

Students' professional competencies, indicators of their achievements and learning outcomes in the discipline

The code and name of the competence (the result of mastering)	The code and name of the competence achievement indicator	The name of the assessment indicator (the result of training in the discipline)
<p>PC-11 Ready to conduct an expert examination of temporary disability, participate in medical and social expert assessment, ascertain the biological death of a person</p>	<p>PC-11.1 Knows the procedure of examination of temporary disability and signs of temporary disability of the patient</p>	<p>Knows: the procedure for the examination of temporary disability and signs of temporary disability of the patient Can: identify signs of temporary disability of the patient Owns: skills of action in accordance with the procedure for the examination of temporary disability</p>
<p>PC-12 Ready to determine the need to apply natural therapeutic factors, medicinal, non-medicament therapy and other methods in patients in need of medical rehabilitation and sanatorium-resort treatment in accordance with the current procedures of medical care, clinical recommendations (treatment protocols) on issues of medical care, taking into account the standards of medical care</p>	<p>PC-12.2 Knows medical indications and contraindications to prescribing sanatorium-resort treatment as a stage of medical rehabilitation of the patient</p>	<p>Knows: indications and non-indications to the use of natural therapeutic factors, sanatorium treatment and stages of medical rehabilitation of patients, in accordance with the procedures for providing medical care, clinical recommendations Can: to perform conclusions with recommendations for sanatorium treatment, to carry out medical rehabilitation independently, in accordance with modern standards and clinical recommendations Owns: skills in determining indications and contraindications to sanatorium treatment, the use and conduct of medical rehabilitation and sanatorium treatment</p>
<p>PC-14 Ready to organize and control immunoprophylaxis of infectious diseases in the adult population in accordance with the current order of medical care, clinical recommendations (treatment protocols) on the provision of medical care, taking into account the standards of medical care</p>	<p>PC-14.1 Knows preventive measures taking into account the diagnosis in accordance with the current orders of medical care, clinical recommendations (treatment protocols) on the provision of medical care taking into account the standards of medical care</p>	<p>Knows: principles and features of the prevention of diseases and (or) conditions, taking into account the standards of medical care Can: to carry out preventive measures taking into account the diagnosis in accordance with the current procedures for the provision of medical care, clinical recommendations (treatment protocols) on the provision of medical care, taking into account the standards of medical care Owns: the skills to develop preventive measures taking into account the standards of medical care</p>

<p>PC-15 Able and ready to carry out anti-epidemic measures, organization of population protection in foci of especially dangerous infections, in case of deterioration of radiation situation, natural disasters and other emergencies</p>	<p>PC-15.1 Knows the rules of sanitary and epidemic measures</p>	<p>Knows: principles of the organization of sanitary and anti-epidemic (preventive) measures in order to prevent the occurrence and spread of infectious diseases Can: plan and implement measures to introduce restrictive measures (quarantine) Owns: skills in determining medical indications for the introduction of restrictive measures (quarantine) and indications for referral to a specialist in the event of infectious (parasitic) diseases</p>
<p>PC-16 Is able and willing to analyze morbidity, disability and mortality rates to characterize the health of adults and adolescents</p>	<p>PC-16.1 Knows the medical and statistical indicators of morbidity, disability and mortality characterizing the health of the attached population, the procedure for their calculation and evaluation</p>	<p>Knows: methodology of statistical research, regulatory documentation on the examination of the quality of medical care to the population Can: to calculate indicators of the quality of medical care; to develop measures aimed at improving the quality of medical care Owns: skills in calculating and basic indicators of the quality of medical care that characterize the health of the attached population</p>
<p>PC-17 Ready to participate in the assessment of the quality of health care delivery using basic medico-statistical indicators</p>	<p>PC-17.2 Is able to analyze medical and statistical indicators of morbidity, disability and mortality to assess the health of the attached population</p>	<p>Knows: regulatory documentation on the examination of the quality of medical care to the population Can: to analyze medical and statistical indicators of morbidity, disability and mortality to assess the health of the attached population Owns: skills in calculating and analyzing medical and statistical indicators of morbidity, disability and mortality to assess the health of the attached population</p>
<p>PC-19 Ready to maintain medical records, including electronic records</p>	<p>PC-19.1 Knows the rules of registration of medical documentation in medical organizations providing medical care on an outpatient basis, including at home when called by a medical worker</p>	<p>Knows: Can: fill out medical documentation and monitor the performance of official duties by a district nurse and other medical personnel at their disposal. Owns: skills of registration of medical documentation in outpatient clinics</p>

<p>PC-19 Ready to maintain medical records, including electronic records</p>	<p>PC-19.3 Is able to complete medical documentation, including in electronic form</p>	<p>Knows: rules of registration of medical documentation in medical organizations; rules of work in information systems and information and telecommunication network "Internet". Can: to fill out medical documentation, including in electronic form; to use information systems and the Internet information and telecommunication network in professional activities Owns: skills in maintaining medical records; skills in working in information systems and the Internet information and telecommunications network.</p>
<p>PC-4 Ready to collect and analyze patient complaints, patient history, physical examination, laboratory, instrumental, pathological, anatomical and other investigations in order to recognize a condition or establish the presence or absence of a disease in accordance with the current procedures for the provision of medical care, clinical recommendations (treatment protocols) for the provision of medical care, taking into account the standards of medical care</p>	<p>PC-4.6 Knows orders of medical care, clinical recommendations (treatment protocols) on issues of medical care, standards of medical care</p>	<p>Knows: the standards of medical care; current clinical guidelines (treatment protocols). International Statistical Classification of Diseases Can: the standards of medical care; current clinical guidelines (treatment protocols). International Statistical Classification of Diseases Owns: Possesses the skills of prescribing etiotropic and pathogenetic therapy in accordance with the current procedures for the provision of medical care, clinical recommendations (treatment protocols), and methods of providing medical care.</p>

<p>PC-4 Ready to collect and analyze patient complaints, patient history, physical examination, laboratory, instrumental, pathological, anatomical and other investigations in order to recognize a condition or establish the presence or absence of a disease in accordance with the current procedures for the provision of medical care, clinical recommendations (treatment protocols) for the provision of medical care, taking into account the standards of medical care</p>	<p>PC-4.5 Knows the methods of laboratory and instrumental investigations to assess the state of health, medical indications for conducting investigations, rules of interpretation of their results</p>	<p>Knows: the procedures for providing medical care, clinical recommendations (treatment protocols) on the provision of medical care, standards of medical care, the International Statistical Classification of Diseases; the required volume of additional examination methods: laboratory, instrumental, in accordance with current clinical guidelines (treatment protocols)</p> <p>Can: to determine the need and scope of additional examination methods: laboratory, instrumental, in accordance with current clinical guidelines (treatment protocols), procedures for providing medical care and taking into account the standards of medical care; the need for referral to specialist doctors in accordance with current clinical guidelines (treatment protocols)</p> <p>Owens: Possesses the skills to evaluate the results obtained to justify the choice of the optimal algorithm for examining the patient, appointment of consultations of medical specialists</p>
<p>PC-4 Ready to collect and analyze patient complaints, patient history, physical examination, laboratory, instrumental, pathological, anatomical and other investigations in order to recognize a condition or establish the presence or absence of a disease in accordance with the current procedures for the provision of medical care, clinical recommendations (treatment protocols) for the provision of medical care, taking into account the standards of medical care</p>	<p>PC-4.4 Is able to determine the order of the volume, content and sequence of diagnostic measures taking into account the standards of medical care</p>	<p>Knows: clinical examination of diseases and conditions requiring referral for laboratory and instrumental examination, taking into account current clinical recommendations and protocols, procedures and standards of medical care.</p> <p>Can: base to the necessity, scope and order of laboratory and instrumental examination of children; to interpret the results of laboratory and instrumental examination</p> <p>Owens: skills to plan for laboratory and instrumental examination of patients in accordance with current clinical recommendations (treatment protocols), procedures for providing medical care.</p>

<p>PC-5 Is able to establish a diagnosis taking into account the current international statistical classification of diseases and health-related problems (ICD)</p>	<p>PC-5.4 Is able to apply the International Statistical Classification of Diseases and Related Health Problems (ICD) to make a diagnosis</p>	<p>Knows: the international statistical classification of diseases and health-related problems Can: Able to formulate a diagnosis according to the international statistical classification of diseases and health-related problems Owns: Has the skills to make a diagnosis according to the international statistical classification of diseases and health-related problems</p>
<p>PC-5 Is able to establish a diagnosis taking into account the current international statistical classification of diseases and health-related problems (ICD)</p>	<p>PC-5.3 Is able to differentiate diseases of internal organs from other diseases</p>	<p>Knows: etiology and pathogenesis of diseases and conditions in children; clinical symptoms of diseases; features of diagnosis and clinical course of diseases; modern classification of diseases; international statistical classification of diseases and health-related problems Can: to perform a differential diagnosis of diseases; to substantiate the clinical and final diagnosis; to formulate a diagnosis taking into account modern classifications and the international statistical classification of diseases Owns: skills of differential diagnosis; skills of substantiation of the diagnosis; skills of formulation of the diagnosis taking into account modern classifications and the international statistical classification of diseases and health-related problems</p>

<p>PC-7 Ready to prescribe medicines, medical devices and therapeutic nutrition taking into account the diagnosis, age and clinical picture of the disease and in accordance with the current orders of medical care, clinical recommendations (treatment protocols) on the provision of medical care taking into account the standards of medical care</p>	<p>PC-7.2 Is able to prescribe medicines, medical devices and therapeutic nutrition taking into account the diagnosis, age and clinical picture of the disease in accordance with the current order of medical care, clinical recommendations (treatment protocols) on the provision of medical care, taking into account the standards of medical care</p>	<p>Knows: the basics of medicines, non-drug therapy, diet therapy, taking into account the diagnosis and clinical picture of the disease in accordance with current clinical recommendations (treatment protocols), procedures for medical care. Can: to perform a plan of drug, non-drug therapy, diet therapy, taking into account the diagnosis and clinical picture of the disease in accordance with current clinical recommendations (treatment protocols), procedures for medical care. Owns: the skills of planning individual programs of drug, non-drug therapy, diet therapy, taking into account the diagnosis and clinical picture of the disease in accordance with current clinical recommendations (treatment protocols), procedures for providing medical care.</p>
<p>PC-8 Ready to prescribe non-medication treatment taking into account the diagnosis, age and clinical picture of the disease in accordance with the current orders of medical care, clinical recommendations (treatment protocols) on the provision of medical care, taking into account the standards of medical care</p>	<p>PC-8.1 Knows modern methods of non-medicinal treatment of diseases and conditions in the patient in accordance with the current procedures of rendering services</p>	<p>Knows: modern procedures for providing medical care for various nosologies and conditions Can: to perform plan for non-medicines treatment of diseases and conditions in the patient in accordance with current medical care procedures Owns: skills of non-medicines treatment for various conditions and nosologies in accordance with current medical care procedures.</p>

<p>PC-8 Ready to prescribe non-medication treatment taking into account the diagnosis, age and clinical picture of the disease in accordance with the current orders of medical care, clinical recommendations (treatment protocols) on the provision of medical care, taking into account the standards of medical care</p>	<p>PC-8.2 Is able to prescribe non-medication treatment taking into account the diagnosis, age and clinical picture of the disease in accordance with the current order of medical care, clinical recommendations (treatment protocols) on the provision of medical care, taking into account the standards of medical care</p>	<p>Knows: the main methods of non-medicines treatment for various conditions and nosologies in accordance with current medical care procedures, clinical recommendations (treatment protocols) on the provision of medical care, taking into account the standards of medical care Can: prescribe non-medicines treatment taking into account the diagnosis, age and clinical picture of the disease in accordance with current medical care procedures, clinical recommendations (treatment protocols) on the provision of medical care, taking into account the standards of medical care Owns: skills of non-medicines treatment for various conditions and nosologies in accordance with current medical care procedures.</p>

VII. EDUCATIONAL AND METHODOLOGICAL SUPPORT OF STUDENTS' INDEPENDENT WORK IN PRACTICE

Student independent work (IWS) is one of the forms of practice and is organized with the aim of: systematization and consolidation of the received theoretical knowledge and practical skills of students; deepening and expansion of theoretical knowledge; formation of the ability to work with various types of information, the ability to use normative, legal, reference documentation and special literature; development of cognitive abilities of students; formation of such personality traits as responsibility and organization, independent thinking, ability for self-development, self-improvement and self-realization.

Tasks for educational practice are formed in the Internship Program of the FEFU School of Medicine. The content of tasks for practice is based on the general

professional and special disciplines passed to the beginning of the practice. At the working stage of the internship, students get acquainted with the

structure of the medical institution, constituent documents, functional duties (job descriptions) of the employees of the departments in which the internship takes place, and acquire the skills of independent professional work in

their specialty. Practical tasks should be carried out in stages, with the consistent development of gradually becoming more complex actions and techniques that make up a set of skills and abilities that determine the practice program.

The individual work of a student at a temporary workplace is organized by the head of the practice under the supervision of the employees of the departments in which the student is doing the practice. After completing the internship, the student submits a written report on its passage to the head of the internship from FEFU for verification and, if necessary, follows his recommendations for finalizing the report.

The internship report should include the following documents:

1. Voucher (referral) to practice with notes on the day of arrival, departure, stamps and signatures of responsible persons;
2. Practice diary containing daily records of work performed. After the next week of internship, the data reflected in the diary must be confirmed by the signatures of the student and the head of the practice from the practice base. The diary as a whole must also be certified by the signature of the head and the seal of the relevant body (organization);
3. The student-intern's own report on the work done during the internship should include: a brief description of the place of internship (organization), goals and objectives of the internship, a description of the activities performed during the internship, the results achieved, an analysis of the problems encountered and options for their elimination, own assessment of the level of their professional training based on the results of practice.
4. Characteristics, signed by a competent official of the body or organization in which the practice was completed, and certified by the seal; All documents included in the report must be submitted in printed form, filed in a folder (bound) and numbered with the compilation of their inventory.

VIII. FORMS OF CERTIFICATION (BASED ON THE RESULTS OF PRACTICE)

The academic internship is considered completed if the student fulfills all the requirements of the internship program.

Reporting form: Dairy

Report

Methodological materials defining the assessment procedure

To receive a positive assessment based on the results of the internship, the student must fully complete the internship program, timely issue and submit to the head of FEFU all necessary accounting documents reflecting the results of the internship.

The package of accounting documents on the internship includes the following documents certified by the signature of the head and the seal of the organization:

- individual task;
- internship report;
- a document confirming the fact of internship (confirmation certificate), in case of internship in a third-party organization (Appendix 1);
- a description compiled by the head of the practice from the organization, in case of internship in a third-party organization.

The report serves as the main document reflecting the implementation of the practice program. The content is determined by the individual task and the requirements of the program.

The practice report should consist of a title page, table of contents, main part, conclusion, list of sources and literature used, appendices (if available). As appendices, copies of documents (regulations, reports, etc.) studied and used by the student during the internship may be included in the practice report.

The main part of the report should include the following sections:

- brief description of the enterprise (organization, production unit, company), in case of internship in the organization;
- the main section is the disclosure of an individual task (description of the work performed using calculations, diagrams, graphs, drawings, programs);

– brief conclusions on the results of the practice, suggestions for improving its organization.

Practice reports are drawn up in accordance with the requirements of the ESCD for textual technical documents. The practice report is provided on A4 sheets (AZ format is allowed for applications), upper and lower margins - 20 mm, right - 15 mm, left - 30 mm, text alignment - width, paragraph indentation - 1.25 cm. The volume of the report (excluding the review of the head of the practice from the relevant organization and the individual assignment) should be at least 15 pages of printed text. The text is prepared using the Microsoft Word text editor (or its equivalent) and saved as a file in formats.doc or docx using 1.5 spacing and using 14 Times New Roman font size.

The production characteristics are given on the last page of the report, signed by the head of the organization and stamped.

The protection of the practice is carried out in due time to the head of the practice from the FEFU. The defense takes place in the form of an oral interview, where each student is allocated 5-10 minutes. for a public report on the results of the practice and the completion of an individual task. Students can express their comments and suggestions about the course of the internship and make suggestions for improving its organization.

According to the results of the defense, a credit with an assessment is issued for practice. At the same time, the content and quality of accounting documents, answers to questions from the head, and production characteristics are taken into account. The assessment for practice is equivalent to the examination grades for theoretical courses.

Evaluation scale and criteria for evaluating the results of the protection of the practice report

When grading excellent in the defense of the practice report, the student must demonstrate an increased level, grades good - the basic level, and grades satisfactory - the threshold.

The main objects of evaluation of the results of the internship:

- student's business activity during the internship;

- the student's production discipline;
- the quality of the individual task;
- the quality of execution and design of the practice report;
- the level of responses when passing the test (protecting the report);
- characterization and evaluation of the student's work by the head of the internship from the place of internship.

Criteria for grading a student on a practice test

Evaluation	Requirements for the formed competencies
«great»	The report is made in accordance with the requirements imposed on it using computer technology, the answers to the questions posed by the head of the practice are covered in full, with a sufficient degree of professionalism and competence, the content of the answers indicates the confident knowledge of the student and his ability to solve professional problems
«good»	The report is made in accordance with the requirements imposed on it, but there are minor inaccuracies, inaccuracy in execution, an incomplete answer to one question asked by the supervisor, but the content of the answers indicates sufficient knowledge of the student and the ability to solve professional problems
«satisfactory»	The report was executed in violation of the requirements for registration, sections in the report were skipped, carelessness in execution, poor orientation of the student according to the report, incomplete answers to two questions, the content of the answers indicates the knowledge of the student and his limited ability to solve professional problems
«unsatisfactory»	The internship report is not presented, the student does not understand the questions asked by the head of the internship, cannot answer questions related to the place of internship and the performance of his duties

A student who fails to complete the internship program without a valid reason or receives an unsatisfactory grade is considered to have academic debt. The liquidation of this debt is carried out in accordance with the FEFU regulatory documents.

IX. EDUCATIONAL, METHODOLOGICAL AND INFORMATIONAL SUPPORT OF THE PRACTICE

1. Hospital surgery. Seminar classes : a textbook for universities / S. G. Shapovalyants [et al.]; edited by S. G. Shapovalyants, R. V. Plakhov, A.V.
